

Southern Observatory for Human Rights (SOHR) **Report for the months of April, May and June 2014**

Bern Switzerland, 10 July 2014

Southern Observatory for Human Rights (SOHR) issued its report for the second quarter of 2014, including more violations and crimes committed by the Yemeni forces against the citizens of South Yemen during the months of April, May and June of this year. All those facts evoked the Southern Observatory to adopt the task of observing and documenting all those violations during this period, and to let the international community know how dangerous those violations are on the lives of Southerners.

Southern Observatory was able to register and document during the month of April, May and June 2014, 53 extrajudicial (22 cases between them killed by unidentified gunmen), 69 attempted murders, causing different injuries, and 20 arbitrary arrests. The Southern Observatory notes that those violations which will always serve as a witness on the crimes perpetrated by the Yemen authority forces against the citizens of South, and they will always be considered as a shameful stain on the forehead of those forces until criminals are justly punished.

In the plan adopted by a number of symbols of the Yemeni regime, in order to confuse the security and shake the stability in South Yemen, has seen many of the southern provinces lose the security and led to the appearance of armed groups, one of them named "Ansar Al Sharia" which is allied with Al Qaeda. The military forces have spread in southern provinces (Abyan Shabwa), which turned into an arena of war with these terrorist organizations. And after the control of the militias on those two cities has been referred to the main squares of the war. There is killed dozens of civilians and destroyed infrastructure of towns, and destroyed people's homes and displaced their places, particularly in the areas of Al-Mahvd Directorate in Abyan province and areas of Maifa'a and Alsaed Directorates in the province of Shabwa. The Yemeni Authority thinks that terrorism can be eliminated the peaceful southern movement, and has also can be

intimidating neighboring countries and the West countries of the threat from Al Qaeda.

The authority forces pursues style chaos security situation in the southern provinces, through the creation of imbalances security, including bombings and shootings random to terrify the citizens, as well as encourage the phenomenon of carrying weapons, and silence on some actions and killings of some southern cadres, which have always unidentified perpetrators. The Yemeni army and its leaders have not been deterred by the Sana'a government. Those crimes were concentrated in the south Yemen since 1994 and are continuous till now, without any international deterrent. Based on the contents and texts of the international agreements, signed by Yemen, the United Nations must send for significant Yemeni military leaders- who seize the control of the Yemeni army and who are proud of their crimes that violate all human rights and both the local and international laws.

The Southern Observatory for Human Rights reviews some aspects of the shameful record of the Yemeni government in the field of human rights towards the people in South Yemen, draws attention to the seriousness of the outcome of the human rights situation in that region, and reached the case of grave abuses against its citizens. And that as the calls on the Yemeni government to stop these policies towards the citizens of South Yemen, and to zero tolerance with the perpetrators of such violations, but the need to bring them to trial to obtain their just punishment. And the Southern Observatory holds the Yemeni government all the responsibility of lawlessness that prevail in all the provinces of the South, and what constitutes dangerous to destabilize the security situation, and their implications for the stability and their safe life.

Those policies aimed at subjugating the South by force and keeping it under the hegemony of the Yemeni authorities, which indicates that the southern people will always suffer from the oppression and killing against it and will continue to be exposed to different methods of maltreatment and deprivation of its freedoms and aspirations, add to that the massacres those forces may perpetuate without any accountancy or watching. Under these conditions, Southern Observatory is calling it to adopt a mechanism that would protect the southern people from the tyranny of the military apparatus belonging to the Yemeni regime, calling the Yemeni government to respect its international commitments and pledges towards human rights and to stop violence against the southern civilians.

The Southern Observatory also finds that affects the lives of the living and the security and stability of South Yemen from grave danger dislodge today became the responsibility of the international community, who has vowed to legally and

ethically to the protection of human rights wherever they were. We appealed to the international community to take its importance of intervening to save the citizens of South Yemen from their tragic situation, using international mechanism capable to stop these violations, while the Southern Observatory is realizing that such violations will not stop, unless the people of the South get their freedom and independence.

Southern Observatory believes that those efforts exerted by the Yemeni political system are gross violations against the southern people's right to express its aspirations, choose its trends, and restore its independent state. Thus, Southern Observatory calls the Yemeni authorities that admit the failure of the unity project, to comply with the language of mind and reason, and consent the right of the southern people to self-determination, to restore its independent state, and to establish good neighborly relations between the two peoples.

**The dead of southern citizens by Yemeni forces during the month of
April – May - June 2014**
